Great Information for Teachers

May 14, 2019

Introduction

Hi Everyone. Here are some new sites I've found for you. If you need help finding resources on any topic, please let me know. I will be happy to find the information for you.

Olga

WEBSITES and APPS

MATH and SCIENCE

Project Noah is a tool to explore and document wildlife and a platform to harness citizen scientists everywhere. www.projectnoah.org

ENGLISH and SOCIAL STUDIES

Global Goals - is home to the world's largest lesson. The site introduces students to the 17 sustainable development goals agreed upon by world leaders for a better world by 2030. Some of these goals are to end poverty, fight inequality, and stop climate change. Each goal includes lessons and resources to use with students of all ages. <http://worldslargestlesson.globalgoals.org/>

EVERYONE

The Learning Network offers a wealth of participatory and real world learning experiences for both teachers and students using The New York Times. Students have access to an article of the day, a news quiz, and a student opinion section. Teachers can access lesson plans in core subject areas including English, Science, Math, Social Studies, Art, and ELL. There are also lessons on topics that build technology skills such as podcasting. New content is added weekly.
