

WALLINGTON PUBLIC SCHOOLS

WALLINGTON, NEW JERSEY

GLUCAGON PARENT NOTIFICATION

The Wallington Public School District's policy on Glucagon® permits the administration of Glucagon® to pupils for severe hypoglycemia by the school nurse or a trained delegate. This is permitted by P.L. 2009 Ch. 361 and codified as N.J.S.A 18A: 40-12.11-12.21 under emergency conditions.

The district policy requires parent notification and parental written authorization for the administration of Glucagon®. The parent shall, in addition, provide written orders of prescriptions from their physician or advanced practice nurse. The prescriptions or orders shall state the pupil is in need of the administration of Glucagon® for severe hypoglycemia and the student does not have the capacity to administer the medication him/herself.

If the procedures specified in the policy are followed, the district and/or its employees or agents shall have no liability as a result of any injury arising from the administration of the Glucagon® to a pupil.

The policy regarding the administration of Glucagon® and other medications is available on the school district website or in the Health Office. Please complete the attached permission form and return it to the school nurse with all required documents, if they have not been already sent.
